

F-3: Van Sickle Island Photo Log **Photos taken on June 11, 2003**

Van Sickle Island – 150 ft landward of levee at Station 70+00 (beginning of Site 2), looking toward levee road.

Van Sickle Island – Looking northeast along landward levee slope at burn area ~Station 76+00.

Van Sickle Island – looking north (landward) from levee road ~Station 76+00.

Van Sickle Island – looking west (landward) from levee slope near Station 76+00.

Van Sickle Island – ponded area at Station 80+00, looking southwest from top of levee road.

Van Sickle Island – at Station 80+00 looking north (landward) from levee road where ditch/canal turns sharply north.

Van Sickle Island – alkali patch (approximately 50 ft X 50 ft) at ~Station 83+00, looking northeast.

Van Sickle Island – looking southwest at *Salicornia* field from landside at alkali patch (~Station 83+00).

Van Sickle Island – *Salicornia virginica* and *Salicornia europaea*

Van Sickle Island – landward of Station 90+00, looking west along levee.

Van Sickle Island – landward of Station 90+00, looking east along levee.

Van Sickle Island – at Station 100+00, looking west from landward levee toe.

Van Sickle Island – at Station 100+00 looking east from landward levee toe.

Van Sickle Island – looking east along levee road toward southeast tip of island from top of rip rap placed on waterside of levee crown ~ Station 105+00.

Van Sickle Island – looking landward (northwest) from levee road at ~ Station 105+00, *Scirpus* in foreground and *Salicornia* extending in the background.

Van Sickle Island – 150 ft landward of Station 110+00, looking west toward large ponded area.

Van Sickle Island – 150 ft landward, looking toward levee road at Station 120+00. Mix of *Lepidium* and *Salicornia* in foreground and *Rosa californica* and a willow (*Salix* spp.) tree immediately landward of levee toe.

Van Sickle Island – close up of vegetation landward of levee at Station 120+00. Mix of salt grass (*Distichlis*), pepperweed (*Lepidium*) and pickleweed (*Salicornia*).

Van Sickle Island – Station 130+00 – 100 ft landward, looking toward levee (end of Site 2).

Van Sickle Island – Station 130+00 – 100 ft landward of levee, looking east.
